

Monday, November 18, 2013 Kilimatinde Hospital Report (The tables within this report have not displayed)

With a capacity of 150 beds, Kilimatinde Hospital averages an admissions rate of 110 patients per month. Its postal address is: P.O. Box 86 Manyoni, Tanzania Telephone: +255717233721 Email address: kilimatindehosp@yahoo.com

Short background history of Kilimatinde Hospital The Rev Canon Ralph Banks, a missionary from Manchester, United Kingdom, founded Kilimatinde Hospital. The Anglican Diocese of Central Tanganyika (DCT), originally owned Kilimatinde Hospital. Then in 1991, the DCT was divided into two dioceses and the new Diocese of the Rift Valley (DRV), took over the hospital and the same year, it lost its DDH status when the government converted the health centre in Manyoni town to be the official District Hospital,

Physical visit and observation of the Hospital

The hospital provides a range of medical services.

X-Ray service The building housing the X-ray machines is a well-built structure. One large Siemens X-ray machine has been out of order for a long time. The repair person contracted to service the machine made a poor job of it, leaving it worse off by removing but not replacing its coils, and dismantling fuses and capacitors.

A failed attempt was made to install an American-made X-ray machine. Tunajali has donated an X-ray machine. We are waiting for a technician to install it after the completion of a three-phase electrical line. A technician is needed to test this machine and see if it still works, but it is very expensive to hire a consulting technician. Number of staff: 1

Radiographer
Radiographic Assistant
Radiographic Attendant 001

The hospital does not currently provide x-ray services due to lack of good X-ray machine and lack of required competent staff. The machine and room look desolate and in disarray.

Pharmaceutical Services The pharmacy is housed in a large, spacious room within the administration building and is stocked with drugs and other hospital supplies. Number of staff: 2

Pharmacist
Pharmaceutical Technician
Pharmaceutical Attendant (Assistant) 100

In patient services **Wards** **Female Medical-Surgical Ward (Adults)** This new, long building has a capacity of 40 beds. **Male Medical-Surgical ward (Adults)** This long and spacious building

has a capacity of 40 beds. Bed occupancy rate The hospital in-patient bed occupancy rate for the years 2011 and 2012 is not covered in this report.

Clinical and Care-Giving Staff The number of staff providing clinical and nursing care is as follows: Number of clinical staff: 6 *Medical Doctors Assistant Medical Officers Clinical Assistants Clinical Assistants* Male Female Male Female Male Female Male Female 00313020

Number of care-giving staff: 3 *Nurse Officers AMO Enrolled Nurses RCH Aides Medical Attendants* Male Female Male Female Male Female Female Male Female Male 10339160339

This number of staff is allocated to cover morning, evening and night duty shifts. Medical Laboratory Investigation Services The large building providing these services is spacious and well-built. It provides space for various equipment and supplies used for medical laboratory investigations. Some years ago the hospital used to conduct training and education for medical laboratory assistants. The school was closed for unknown reasons.

The number of staff manning the medical laboratory *Laboratory Technician Laboratory Assistant Laboratory Attendant* Male Female Male Female Male Female 102000

The laboratory Technician is seconded from the Government.
